

2015 Price List

The following are prices for recent Martin type guitars only. Any instrument requiring special care (.eg Guild, Gibson, Gallagher, or vintage Martin) may require additional charge. Check with me first regarding those guitars.

Prices are not cumulative. In other words, a neck reset is \$300. There is no extra charge for the setup or any other minor work involved. If you want a new nut, though, that's extra. A custom bridge includes slotting and saddle. It doesn't include slotless pins, but there's no extra charge for slotting for your pins as that's part of the bridge. If I'm making a custom bridge, I don't charge you for taking the old one off. And so forth...if you have any questions, ask!

Item	Description	Price
Guitar		
Action adjustment	Adjust saddle, nut, and truss rod	25.00

K&K Trinity Preamp	160.00
K&K Mandolin Twin Fusion	140.00
K&K Pure Preamp	105.00
K&K Pure XLR Preamp	195.00
K&K Pure XLR Mach 2 Preamp	280.00

A typical full 1970's Martin D-18 or D-28 overhaul will run about like this:

Neck reset- \$300
Tuners- \$85 total for Gotoh open back, more for Waverly
Brace scallop- \$100
Popsicle brace- \$75
Frets, 15, nickel silver- \$215
Bridgeplate- \$100
Pickguard- \$50
Glue loose braces- \$0-60
Bridge if wider spacing or wood upgrade desired- \$150 OR
Remove, reglue in correct location- \$40
Bone nut- \$45
Bridge pins- \$30-50
Shipping to CONUS- \$60

Total cost- \$1100-1290

Not all guitars will need all of this. On many, the frets are in good condition. On others, scooting the bridge back may be all you need or want, not a completely new bridge. If you upgrade to Waverly tuners, expect about another \$100. If you skip anything, skip the popsicle brace and pickguard.
